Instrumentation and Automation Engineer

Description

Are you a highly skilled engineer with a passion for automation and operational excellence? Makaiza Farms Limited, a leading manufacturing company that produces edible vegetable oil, is looking for a seasoned Instrumentation and Automation Engineer to lead and optimize our plant control systems.

Responsibilities

- Manage PLCs, SCADA, DCS, and all instrumentation systems across our production plants
- Drive automation upgrades, troubleshoot faults, and enhance plant uptime
- Collaborate cross-functionally to deliver on performance, safety, and innovation targets
- Live our core values: Integrity, Team & Collaboration, Accountability, Commitment, and Innovation
- Demonstrate flexibility and commitment to meeting operational demands, including availability beyond regular working hours when necessary

Qualifications

- Degree in Electrical, Electronics, or Instrumentation Engineering
- 10+ years in manufacturing or FMCG (vegetable oil experience is a plus)
- Extensive expertise in designing, programming, operating, and troubleshooting industrial automation systems and components developed by leading manufacturers such as Kumar Metal
- Strong analytical, leadership, and communication skills
